### Paint?

There are two good reasons for paint—often enough or even too often. One to look prosperous; two to be so.

Nothing does one more credit or gives one more credit than paint, supplemented of course by what goes with it; and paint costs nothing.

True the first cost is \$5 or \$6 a gallon put-on; but it saves more than that in the property; saves it from slow going down—not always slow—it drops with a jump when water gets in on wood and iron.

Dry wood and iron cost nothing, kept dry by paint.

Better paint when it needs it. Paint never goes down in the sense of being more profitable next year.
